Prof. Samir K. Srivastava – Operation Management Area
The classical newsvendor problem decides the optimal order quantity for a single period, with the assumptions that both the selling price and the end of period salvage value are fixed. However, the salvage value or clearance price in many instances depends on the leftover inventory. A fixed salvage value assumption could lead to suboptimal decisions in many situations. In this paper we determine the optimal pricing and ordering decision for a limited clearance sale inventory model using newsvendor framework with variable salvage value. We consider additive demand model, provide necessary and sufficient conditions for unique pricing and ordering policies, and calculate optimal contract parameters for wholesale price contract in decentralized supply chain setting. We compare our results against classical newsvendor model with fixed salvage value. We analytically prove that the price-setting limited clearance sale inventory model improves the ordering decision and profit level.

The importance of sustainable operations in supply chains has been widely recognised in practice and the extant literature. In this paper, we study coordination issues of a sustainable supply chain that arise due to simultaneous consideration of greening and corporate social responsibility (CSR) initiatives undertaken by supply chain agents. We specifically consider the scenario where the supplier is responsible for greening and the buyer is accountable for social responsibility. We analyse our model using two-stage Stackelberg game-theoretic approach where the supplier acts as a Stackelberg leader. In this context, we analyse the decentralised supply chain setting using five different contract types, namely wholesale price, linear two-part tariff (LTT), greening-cost sharing, revenue sharing, and revenue and greening-cost sharing contracts (RGCS). We demonstrate how optimal greening level, CSR level, retail price and profits of supply chain agents are influenced by different contract types. Our analytical results show that greening and social efforts undertaken by supply chain agents are beneficial for the overall supply chain as long as consumer awareness towards greening and CSR exists. Our results show that channel coordinating mechanisms between supplier and buyer is conducive to improve greening and CSR level. LTT perfectly coordinates the supply chain. Through a numerical example with several key parameters we present the effectiveness of different contracts. The results reveal that as a profit maximising agent the supplier prefers LTT contract and the buyer prefers RGCS contract. This paper extends the understanding of supply chain coordination in the context of sustainability.
Empirical evidence has shown that returns to English language ability are substantial in India. Research has also focused on the impact of private tutoring in the context of developing economies to find evidence that remedial teaching leads to better student achievement and higher test scores. In this paper I analyze whether private tutoring helps in developing English language ability. Simple OLS estimates suggest statistically significant effects but estimated coefficients are rather small at 0.2 percentage points. Presence of confounders and selection bias may potentially understate the true effects of private tutoring on English language ability. To address this issue, I exploit a unique policy experiment in India in a regression discontinuity framework to identify cohorts eligible for private tutoring and compare their outcomes to the ineligible. I use this potentially exogenous policy variation as an instrument for private tutoring and find significant increases in English language ability estimated at 16 percentage points which is much larger than the simple OLS effects. Since standard academic curriculum is not directed towards improving foreign language ability, private tutoring as an input in the education production function seems to offer high marginal returns. From a policy perspective, this implies that private tutoring should be encouraged for enhancing English ability even though there are concerns that this provides disincentives for teachers to teach in school. Publication can be accessed here: https://onlinelibrary.wiley.com/doi/full/10.1111/boer.12142

The traditional role of an academic library was to capture, arrange and disseminate information in a predefined manner. It was a place where the users found pin drop silence to study individually. The use of the internet in learning and teaching changed the information seeking behavior of the library users. Digital publications with open access started becoming popular among students. With the emergence of web 2.0, the emphasis became more on collaborative learning. The students needed a place where they have access to technology and space for group study where they can discuss without disturbing others and getting disturbed. At the same time, some higher level students (researchers) wanted a quiet place in the library (research carrels). The traditional libraries were not designed to accommodate both types of spaces under one roof. The footfall in the libraries started declining. The library users now come to the library only for issue/return of books. Those librarians, who knew where the problem lies, started searching for a solution.

The paper examines all these issues, processes and discusses as to how this transformation can take place effectively.

This paper estimates the impact of minority political reservation on borrowing and lending behavior of households. Using a panel data of households from India, we exploit the variation provided by implementation standards of the mandated reservations, to identify the causal effects of reservation on access to credit. State level revision of allocation of reserved constituencies to the minority groups happens after electoral redistricting (delimitation) using census population figures. We use data from before and after the latest delimitation which happened in 2008 to find that reservations for scheduled tribes (STs) lead to an increase in the likelihood of borrowing and number of loans. No such effect is observed for reservations of constituencies for scheduled castes (SCs). However this changes at the intensive margin; loan sizes increase in response to increased SC reservation shares. We document significant heterogeneity in these effects suggesting that most of the results are driven by the sub-sample of households belonging to the backward castes. This is consistent with motivations of social proximity affecting borrowing and lending patterns. We find evidence of substitution from informal sources of loans towards more institutionalized sources. This suggests welfare gains of the program in terms of effects on the credit markets.

Events

Addressing the august gathering, Dr. Ajit Prasad, Director, IIM Lucknow welcomed the new Chairman of Board of Governors Mr. N Chandrasekaran, underscoring his exemplary leadership citing his past achievements. He highlighted the accomplishments of the institute in the academic year 2017-18. IIM Lucknow published 83 research papers in category journals, did 99 MDPs, trained over 2500 managers and graduated 430 students. He talked about the joint training program of IIM Lucknow and the World Bank on the World Bank’s procurement process, which attracted participants not only from India, but also from Myanmar and Afghanistan. IIM Lucknow also operationalized its L-incubator at its Noida campus, with 7 well-funded start-ups who are engaged in commercializing smart technologies in collaboration with top Energy companies, technology institutions, and investors. He talked about the mission to support 100 incubators with the help of UP Government in Uttar Pradesh & about the successfully executed first-of-its-kind research on “Navigator Study on Responsible Lending in India”.

He also highlighted about IIM Lucknow’s initiative to include research based courses like Behavioral Economics, contemporary management courses like ‘Experiential Learning’ and ‘Framing Identities and Roles through Exploration’ which are not the regular text book classroom courses & courses focusing on ethics and human values like ‘Human Values and Responsible Citizenship’ in the Post Graduate Programme curriculum. In the context of globalization, he mentioned about Executive Education Programme to be launched by IIM Lucknow in Middle Eastern places like Dubai.

Addressing the students, he said, “Don’t think of the past, remember nothing happens by chance. Find your destiny.” Quoting Winston Churchill, he said, “Go create history!”

The New Chairman of Board of Governors of IIM Lucknow, Mr. N Chandrasekaran said it was a great privilege and honor to accept the role and congratulated the graduates for their achievements. He remarked on the fact that students are entering the world at a time when everything is changing with problems being similar on a global scale. He mentioned the lack of jobs, climate change, global terrorism, aging population and failure to cope with massive disruption in technology as the major problems with the world at large reacting with a degree of protectionism. However, the Indian context being different with a huge demand of doctors, teachers, judges & nation builders with the country having the highest number of professional graduates in the pipeline.
Highlighting the lack of access and scale being the chief impediments in India, he said that the business leadership and entrepreneurship has to solve this problem by choosing their industry and part of country and work towards lifting the quality of life and create job opportunities. Addressing the graduates, he said, “As management graduates you are at a very distinct advantage because you can appreciate the role of technology in business and appreciate the business model that are required to make the solutions viable. We need to solve the problems in a short period of time and in a non-traditional way. I hope all of you will reflect on this thought and play an influential role in creating a better India”.

Mr. Sanjeev Bikhchandani, Founder, Info Edge (India) Limited in his video message said, “real professional happiness can be achieved through joy of creation, joy you get from others who appreciate what you have created and the joy you get when your creation makes a difference”. He said that while money is important, it is also essential to figure out one’s inner calling. The best kind of money is the one which we earn when we are happy. He concluded by saying, “The best advice I can give is to keep looking out till you find your calling. When you find your calling, stay with it”.

The ceremony concluded with the recitation of national anthem.

International management programme for executives begins on IIM-L’s Noida campus

HT Correspondent

LUCKNOW: The academic session for the 11th batch of the International Program in Management for Executives (IPMX) commenced on Friday at the Indian Institute of Management, Lucknow’s (IIM-L) Noida campus.

Addressing the new batch, Prof Ajit Prasad, director, IIM-Lucknow, talked about the fabulous learning and networking opportunities offered by the course, especially during the 8-week long international immersion term at a top business school in London that is a critical part of the course and would take place in the coming weeks.

IPMX is an AMBA (Association of MBAs) accredited, full time, one-year residential post graduation programme. Since its inception in 2007, more than 500 students have graduated from this flagship course of IIM-L’s Noida campus and have made a name for themselves across continents in varied roles across multiple domains.

The current batch of the IPMX students has an average work experience of 7.5 years and comprises of an eclectic mix of students, with 11% of female students, 4% from an engineering background, 4% from arts and commerce background. The students have varied exposure in roles from supply chain logistics to IT, manufacturing, power and commerce to name a few.

Head of HR at Societe Generale GSC and an alumnus of the 2nd IPMX batch, Jitender Salwan, along with the keynote speaker, Anuraj Soni, COO of Magic Software, welcomed the new batch and shared many words of wisdom acquired over their years of industry experience.

The welcome address was delivered by Prof Rajiv Kumra, dean, IIM-L, Noida campus, while Prof Neeraj Dwivedi, dean, Programs, talked about the various programs offered by IIM-L at both its campuses.

The program was steered by IPMX chairperson Prof Chandan Sharma.

Founded in 1984, IIM-L is one of the premier management institutions in India. In 2005, with a focus on executive education, it became the first IIM to open a second campus at Noida.

The Noida campus, with its proximity to the vibrant industrial scenario in the NCR, has played a critical role in moulding the next generation of management executives graduating from programs like IPMX, WMP and PGP-SM.

Pioneer News Service - Lucknow

Ensure easy access to jobs, budding managers told

Chairman of the Board of Governors Indian Institute of Management N Chandrasekaran advised the passing out students to help create a better India by using technology in business model for ensuring easy access to job opportunities. He was speaking at the 32nd convocation of IIM-Lucknow on Saturday.

On the occasion, 513 students were awarded diplomas. As many as 396 students from the 32nd batch of PG Programme in Management, 49 from the 13th batch of PG Programme in Agri-Business Management, 12 from Doctoral Programme, three from IFPM Programme, along with 75 students from PG Programme in Management for Working Executives (WMP), 59 from International Programme in Management for Executives (IPMX) batches and 19 from PG Programme in Sustainable Management (PGPSM) from the Noida campus received diplomas.

Vivek Choudhary won the Chairman’s Gold Medal for securing first rank. Joydeep Chakraborty won the Director’s Medal for securing second rank and Kumari Ankita won the PGP Chairman’s Medal for securing third rank.

Bhoomika Gupta won the Bizkool Medal for the Best Student in Information Technology, Pranay Bhabha won Hari Shankar Singhania Medal for the Best All-Rounder, Bharti Gupta won Bughiraja Medal for the Best All-Rounder.

Addressing the students, Chandrasekaran said it was a unique time when problems were happening everywhere in the world and were similar. “There are lack of jobs, climate change, global terrorism, ageing population and failure to cope with massive disruption in technology across the world. In the last 2-3 decades, there has been a shift from process excellence to data.” Chandrasekaran pointed out. He said although the problems were the same everywhere, in India the unique aspect was that there was a tremendous demand for jobs. “We have shortage of people in all sectors. On the one hand, there is lack of people and on the other, there is over 130 million work force coming out. No other country will put in such a workforce,” he said. “I think the primary problem is that of access and if you look deeply, you can find these solutions for both the small and big companies,” he added.

Founder of Info Edge (India) Limited Sanjeev Bikhchandani, in his video message, said: “Real professional happiness can be achieved through joy of creation, joy you get from others who appreciate what you have created and the joy you get when your creation makes a difference.”

IIM-L director Ajit Prasad said that as an institute, they would be making an endeavour to promote happiness. “There is too much of pressure on IIM-L students regarding the studies with the dropout rates increasing. We even had a case of suicide and we will work in the direction of increasing the gross happiness index. We hope that the new breed of students will be a happier lot,” he said. He said Chief Minister Yogi always asked him what they were doing for the state. “I did not have an answer last year, but this year I have a concrete answer. We are promoting entrepreneurship in a big way. There is a mission to support 100 incubators with the help of UP government in the state,” he pointed out.

अपने मनोविश्वास और उपयोगी लेखों को देखते हैं, आइआइएम ने इसके विवेक की बैयरमैन गोल्ड व भारती का बेस्ट ऑर्लराउंडर का मेडल प्राप्त किया। यह एक विशेष प्रतीक है, जो आइआइएम के दृष्टिकोण में विवेक की बैयरमैन गोल्ड व भारती की बेस्ट ऑर्लराउंडर का मेडल प्राप्त किया।

इसके बाद उन्होंने इसे देशभर में जमील किया। उन्होंने कहा है कि यह एक विशेष प्रतीक है जो आइआइएम के दृष्टिकोण में विवेक की बैयरमैन गोल्ड व भारती की बेस्ट ऑर्लराउंडर का मेडल प्राप्त किया।
IIM-Lucknow to make aspiring managers ‘much more happy’

CONVOCATION Director says teachers, students under immense pressure to meet standards

LUCKNOW: The Indian Institute of Management Lucknow (IIM-L) will strive to improve its on-campus happiness quotient. Speaking at the B-school’s 32nd convocation here on Saturday, director Ajit Prasad said that both teachers and students were under immense pressure to meet the institute’s tall performance standards. “As a result, the on-campus happiness quotient has declined,” he said.

Prasad recalled a student’s suicide on the campus last year and said it was probably because he was “unable to cope with pressure”. He added that 20 students also failed to meet the academic standards of their courses. “We have thought of addressing this problem and from the next session, you will see our students much more happy,” he said. However, the director did not elaborate on how the institute would bring about this change.

Tata Sons chairman and the new chairman of the board of governors, N Chandra, also addressed the gathering. He said the students were entering the world at a time when everything was changing and similar problems were emerging in different parts of the world. Mentioning lack of jobs, climate change, global terrorism, aging population and failure to cope with massive disruption in technology as the major global challenges, he said that the world was reacting with “a degree of protectionism”.

“However, the Indian context is different, with there being a huge demand for doctors, teachers, judges and nation builders. Our country also has the highest number of professional graduates in the pipeline,” he said.

Urging the pass-outs to help create a better India, he said, “As management graduates, you are at a very distinct advantage because you can appreciate the role of technology in business and appreciate the business models required to make these solutions viable. I hope all of you will play an influential role in creating a better India.” As many as 313 students received their diplomas on the occasion.

CHIEF GUEST SENDS VIDEO MESSAGE

In recent times, it was the first instance when a chief guest did not show up at the IIM-L’s convocation. Sanjeev Bikhchandani, founder, N-Edge (India) Limited, sent a video message instead in which he said: “Real professional happiness can be achieved through the joy of creation — the joy you get from others who appreciate what you have created and the joy you get when your creation makes a difference”.

Vivek Choudhary bags Chairman’s Gold Medal

Vivek Choudhary was presented the Chairman’s Gold Medal for securing the top rank. The bright youngster is used to bagging first rank. In 2016, he secured the first position in the exam for the Institute of Company Secretaries of India (ICSI) executive and professional programmes. Other medal winners for the Post Graduate Programme in Management and the Post Graduate Programme in Agri-Business Management were Jyotish Chakraborty (director’s medal for securing second rank), Kunwar Ankit (PGP Chairman’s Medal for securing third rank), Bhavna Saxena (Bhatkhand Medal for the best student in Information Technology), Pushpita Bhalerao (Bhatkhand Medal for best all-rounder) and Bharti Gupta (Bhatkhand Medal for best all-rounder).

IPS officer decorated with fellow title

IPS officer Amitabh Thakur was decorated with the fellow title for his research work on impact of leadership, HR practices and stress on police outcome. Thakur undertook a survey of 933 UP policemen from various branches to statistically conclude that an improvement in HR policies could better performance by around 60% and improve job satisfaction by over 70%.
